**PAYMENT**

- UCS accepts all major credit cards.
- School Purchase Orders: Public institutions receive automatic credit for 30 days after receipt of shipment.
- Dealers and General Contractors: Submit credit references or pre-pay with any major credit card, check, or wire transfer.
- Government Purchase Orders: The approval process can take between two and ten days.
- International Orders: Orders must be backed by a letter of credit or prepaid with a wire transfer.
- Freight Quotes: Call 800-526-4856 or send an e-mail to shipping@ucsspirit.com for rates.

**TRUCK SHIPMENT**

Checking & Unloading Instructions: We take great care in filling, checking, and packaging your order. On rare occasions, a package may be lost or damaged in transit. At the time shipment is received: Observe the entire shipment for visible damage and the correct number of pieces. Make notation and take photos of shortage or damage on all copies of the freight bill. Sign for the number of pieces, not the number of pallets. Unpack cartons immediately to check contents for possible damage. If damage (hidden or concealed) is discovered, save the carton, immediately report the damage to the carrier, and request an inspection. Follow up the request in writing and call UCS customer service at 800-526-4856.

Additional charges may apply for special services such as lift gate, inside delivery, etc. Freight Carriers provide delivery to the end of the truck and are not required to provide assistance unloading when the delivery arrives. Please be sure to have enough assistance and/or the proper equipment for unloading upon delivery, or enquire about lift gate service when ordering.

**RETURNS**

Do not return damaged goods to UCS without prior written authorization and an RMA number. Product must be new, unused and in the original packaging, otherwise it is not returnable. Only certain color merchandise is returnable. Call our customer service at 800-526-4856 to arrange a return authorization and merchandise pick-up. Merchandise is subject to a factory restocking charge. The customer is responsible for shipping charges both ways, unless agreed otherwise by UCS in writing.

Warning! Failure to comply with instructions and warning labels could result in serious injury or death. Be sure to read and observe all warnings and instructions posted on equipment and contained in instruction manuals. If you have questions regarding use of our equipment, contact us at 800-526-4856.

UCS equipment is proudly manufactured in Lincolnton, North Carolina.

We are confident the quality of our equipment will meet, if not exceed, your expectations. Satisfaction is ensured through guarantees against defective workmanship and materials.

UCS is environmentally conscious and all children's equipment is lead-free, phthalate-free, meeting CPSIA, ASTM, and OSHA regulations.

All UCS products are subject to the California Safe Drinking Water and Toxic Enforcement Act of 1986, better known as "Proposition 65". Proposition 65 requires clear and reasonable warnings for products that expose individuals in the State of California to a chemical known to the State to cause cancer, birth defects, and other reproductive harm.

All products will have the following warning (or other appropriate warning) affixed: "WARNING: Due to Proposition 65 in the State of California, this product may contain a chemical or substance known to the State of California to cause cancer, birth defects, or other reproductive harm."

Certain products are available to ship within 1-3 business days, while expedited service-Next Day Air, 2nd Day Air, etc may be available. Consult with your representative or call 800-526-4856 for further information.

# UCS™ ULTIMATE 504 LANDING AREA

## ULTIMATE 504 SERIES POLE VAULT & HIGH JUMP LANDING AREA

### INTRODUCING THE ALL NEW ULTIMATE 504 SERIES POLE VAULT AND HIGH JUMP LANDING AREA

#### FEATURING:

- **3" EDGE TO EDGE PILLOW TOP PAD**

Over 2 years of testing and innovation has led to the creation of the unique side flap attachment system. Ensuring your top pad provides full coverage for every jump you make.

- **VTX 2000 REPLACEABLE FASTENING SYSTEM**

The world's first fastening system featuring zipper installation on the base unit allows you to replace worn out attachment points over time.

- **ANGULAX 3013**

Patented box collar integration system allows the front units to be placed on the box collar and remain flat on the surface to allow maximum pole bend.

- **FOAM**

Higher Density/Softer Compression. Our exclusive 3 density lattice construction ensures proper deceleration of your athlete during landing for a safer, more comfortable landing.

- **37 OZ EQUIVALENT VINYL COVERS**

Our vinyl features a full 21oz on the exposed side which gives it better adhesion, greater seam strength and greater tear strength than any other landing area on the market.

- **SEAMS**

Double folded and double stitched with vinyl reinforced mesh attachment points on base units.

- **HANDLES & STRAPS**

Handles and straps have a lifetime guarantee. 2" nylon webbing encased in our exclusive vinyl. Box stitched to encasements then reinforced with an outer box stitch.

At UCS we know that your landing area is an investment in your program and athlete's future.

#### NEW VTX 2000 REPLACABLE FASTENING SYSTEM

The military grade Duracon VTX 2000 system relieves stress from the top pad while minimizing separation, and is fully replaceable with zipper mechanics. Keep your velcro new!

# UCS™ POLE VAULT LANDING AREAS

## UCS POLE VAULT PIT FEATURES:

- **ANGULAX 3013** - U.S. Patented vault box collar system integration (Patent No. 9539457) standard with all UCS landing areas. Features a cut-out to insert the box collar, while providing level landing area and allowing maximum pole bend without interference. A UCS exclusive and Original design.
- **VINYL MATERIAL:** Sides and bottoms of units are manufactured with 37oz. equivalent knife-coated vinyl, which has the highest tear strength in the industry and offers the most vinyl on the exposed side.
- **STITCHING:** Seams and hems are double-folded and double-stitched with high-tenacity Sunstop 232 military-grade Duracon polyester thread.
- **Mesh MATERIAL:** Top pad and all tops of units feature breathable mesh. 1300 denier 14 x 12 PVC extruded polyester spike-resistant fabric. A feature that allows proper air expulsion and deceleration of the athlete when landing.
- **FOAM:** There is a difference! The famous UCS original design has been proven with decades of use. Engineered in a lattice formation, three different densities, prime urethane foam, and compressions decelerate the athlete while providing a comfortable landing.
- **REVERSIBLE 2" TOP PAD:** The top pad is made of vinyl coated woven mesh and 2" of 23lb. ILD urethane foam. The coach's box has a 4" white outline, and UCS in-house digital

## UCS FULL COVERAGE WEATHER COVERS

INCLUDING BASE PROTECTION PADS AND VAULT BOX  
Exclusive 19oz. Sunstop weather covers include a 5 year warranty against defective materials and workmanship under normal use and conditions. Double reinforced sunstop coated thread increases tear strength throughout. **CALL UCS DIRECT FOR PRICING**

printing can provide custom graphics and logos. The tops of all base units, front units, and both sides of the 2" top pad are manufactured out of 14x12 PVC extruded 1300 denier polyester spike-resistant breather fabric.

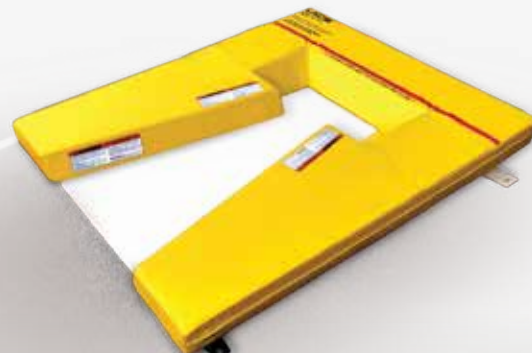

- **HANDLES & STRAPS** - Exclusive: Handles and straps have a lifetime guarantee and are box stitched to the sides of reinforced vinyl base units. 2" nylon webbing is covered with 37oz. knife-coated vinyl. Zippers, seams, and hems are double-folded and double-stitched with high tenacity Duracon polyester thread.
- **VTX 1000 SYSTEM:** The 8" hook and loop fastening system is backed with industry-leading spike-resistant mesh material. VTX relieves stress from the top pad and snap hooks while keeping the pit totally intact, minimizing separation. Additional VTX attaches the center of the front units and the inner angle of front units to extensions.
- **HARDWARE:** All hardware is zinc-coated, rust-free steel, and designed not to break-away.
- **LOGO APPLICATION (OPTIONAL):** Digital printing by UCS offers in-house design and print to meet customization demands.

**Exceeds NFHS and NCAA requirements, while meeting OSHA and ASTM standards.**  
Models 2200, 2100, and 1900 are IAAF Certified.

## UCS POLE VAULT BOX COLLAR SYSTEM

The UCS Pole Vault Box Collar is designed, tested, and manufactured to meet **ASTM F2949-18** standard as required by the **NFHS/NCAA**.

## LANDING AREA PERIMETER PADDING

- Now required by rule in some states. Designed to meet the ASTM Standard F2949-18 performance qualifications, UCS Pole Vault and High Jump Landing Area Perimeter padding is fabricated using our 22oz RipStop vinyl, 4" of ASTM Qualified Foam and features a VTX attachment system (A). Custom designed to fit securely around your specific landing area the perimeter padding provides 4' of additional padding around a system. The Fold'n Half feature (B) and four carry handles (C) make set-up and storage easy. Call UCS with your pad dimensions or manufacturer and model.

# UCS TRACK ACCESSORIES

## FUTURA CAMERA & WIND GAUGE POST

- Well-balanced and rust resistant

**WARNING** UCS Throwing Event Cages should be used as intended per manufacturer. Prior to starting any activity check to ensure nets are hung correctly at the highest points possible and is free of damage. To minimize sag it may be necessary to adjust attachment points on the net. All athletes, coaches, officials, spectators as well as people within the general vicinity of the cage should be alert and cautious of the activities occurring within the cage. Do not stand directly behind the net during activities within the cage. Ensure all net stabilizer arms are engaged; contact UCS for replacement stabilizer arms should they be misplaced or damaged. A minimum clearance of 15' should be established around the perimeter of the poles for safety. Anyone within 30' of the outer poles should be alert to activities within the cage. At the conclusion of any activity nets should be lowered to prevent damage during inclement weather. Hammer Cage doors need to be secured using the door locks and anchors provided at the conclusion of activity. Store nets in a dry location during the off-season or when cage will not be used or inspected for an extended period of time.

## RUNWAY SYSTEM

Development and testing have delivered the high performing and durable portable runway system. Aluminum C-Channel forms the 48" (1.22m) x 8' (2.44m) base structure and has leveling adjustment for complete stability and easy transitions. Welded wings enable each section to lock together with stainless steel hardware. Cross section is supported by aluminum planking spaced effectively to allow a response with results, while also locking in wood understructure for surfacing to be applied. Specially designed and re-enforced vault box section and/or Long/ Triple Jump section integrate into the frame for security. Available with or without Surfacing (Consult factory)

### Model:

- 800-4800- 8' Section (No Surfacing)
- 800-4801- 8' Section with built in UCS Model 519-2100 Take off System (No Surfacing)
- UCS Indoor Sand Pit form with Sand Catcher and custom padded sides available (Consult Factory)
- 800-4805- 8' Section with built in UCS Model 711-1100 Pole Vault Box (No Surfacing)
- Pole Vault Landing Area Platform options are available (Consult Factory)
- 800-3100 Soft Sand Pit System

**CALL UCS DIRECT FOR PRICING**

# X-20 RACK SYSTEM

ELITE LEVEL **PERFORMANCE**

Simplicity and versatility are key components of the X-20 Rack System. The X-20 is manufactured to the industry's highest standards. The open design lends itself to being the most functional and versatile rack for any weight room.

- 7-gauge tubing, welded upright and base construction.
- Frame, base, and accessory parts are sand-blasted prior to powder-coating, creating the highest possible powder to steel adhesion properties.
- Standard Equipment: Weight storage unit, bar holder, combo grip pull up bar, quick release single bar holders safety spot arms.
- Available in 8' or 9' heights.

# X-50 RACK SYSTEM

ELITE LEVEL **PERFORMANCE**

The versatile and efficient X-50 Rack System allows two athletes to engage in activity at the same time, each with an individual spotter. With the ability to adapt to any program and create more space, the X-50 Rack System is the most popular rack at all levels.

- Four 3" x 3" 7-gauge welded uprights, linked together by a double sided side entry weight storage system (Wrinkle Black powder-coated), giving both sides the ability to store equal amounts of plates.
- Standard Equipment: Dual sided side entry weight storage unit, safety spot arms, vertical bar storage, two combo grip pull-up bars, two pairs of quick-release single bar holders.
- Available in 8' or 9' heights.

# MULTI-FUNCTION BENCH

WITH DOCKING STATION

The Multi-Function Bench is the perfect compliment to any X-Series Rack.

- 54"L x 24"W (fully extended)
- Laser cut 1/4" steel plate and 7-gauge tube components create the stable bench understructure
- One piece back support structure eliminates flexing of the frame during activity
- Unique stitch pattern removes seams from high pressure points **(A)**
- All adjustments can be performed while seated
- Horizontal movement is achieved with a block and rail bearing system allowing 12 1/4" total bench travel **(B)**
- Front seat adjusts independently to five positions, from 0-35 degrees
- A pneumatic piston assists the adjustment of the bench back to these positions: 0, 20, 35, 45, 50, 60, 65, and 82 degrees **(C)**
- Unique stitch pattern removes seams from high pressure points
- Specially designed 3" total height pad, with 2" EVA foam
- Raised, diamond plate spotter's platform
- Welded handle and non-marring wheels enable tilt 'n roll mobility
- Available in custom colors

NFL RETIRED

# GLUTE-HAM MACHINE

ENGINEERED INNOVATION

Innovative engineering, stylish design, and durability are combined to create the most impressive Glute-Ham Machine. Its unique design allows athletes of all sizes to perform activities safely and comfortably.

- 72"L x 38"W
- 7-gauge steel construction, fully welded frame
- An innovative pad design offers numerous activity positions in addition to traditional glute-ham exercises
- A gradual curve of the pads creates a comfortable, supportive platform
- Pad can rotate to a flat padded platform, ideal for abdominal activity
- Two welded band attachments increase the Glute-Ham's versatility
- The foot support system operates on hidden rails beneath the platform, providing a walk-through design eliminating the tripping hazard of a center support bar
- The piston-driven footrest raises the pads vertically by depressing one foot pedal or horizontally by depressing the other foot pedal
- Curved upper pads offer a unique shelf to help align the athlete into proper position
- Available in custom colors

# UCS SQUAT TRAINER

THE ULTIMATE TOOL FOR EXPLOSIVE POWER

The all new UCS Squat Trainer has been designed to give your athletes the ultimate tool for explosive power. Continuing the tradition of UCS, the UCS Squat Trainer is built from 7-gauge steel tube and 1/4" steel plate.

- Configured to attain a full squat
- Shoulder pads adjust with a single hand while the athlete is on the machine
- No unloading required
- Horizontal mounted weight horns are angled to prevent any risk of movement during use
- Steel reinforced band provides a quiet and durable movement system
- Athlete's platform is covered in a dense 3/4" rubber for sure-footing and impact absorption
- Available in custom colors

CODE	DESCRIPTION	PRICE
A-630614	Squat Trainer	\$3,902

plyosafe **ELITE BOXES**

OFTEN IMITATED, **NEVER DUPLICATED**

A UCS original, these fully padded Plyo-Box sets (26" x 26" x specified height: measuring 24", 18", and 12") not only provide protection from common Plyo-Box injuries but give any weight facility a professional look. The understructure of this equipment is comprised of the finest 3/4" oak covered in a dense foam which is upholstered in tough 38oz Boltflex vinyl. Each corner is strengthened with two stainless steel "L" brackets. A raised lip on all boxes allows stacking and locking of the lids. The 24" box is bottomed with 3/4" high density rubber for stability. With four primary pads and four curved corner pads there are no sharp edges or dangerous corners exposed to the athlete. Stainless steel handles are recessed on two sides of each box. Each pad is individually replaceable.

CODE	DESCRIPTION	PRICE

plyosafe **G2 BOXES**

OFTEN IMITATED, **NEVER DUPLICATED**

Strength and Speed's Plyo-Safe line continues to revolutionize the plyometric industry. As with Plyo-Safe Elite Boxes, Plyo-Safe G2 Boxes offer the ultimate combination of durability, stability, and safety. With an extra large landing surface of 30" x 36", fears of missing the box are eliminated. They are made with a 100% polyurethane foam core that will not break down or delaminate, and a 21oz knife coated vinyl with built-in bacterial inhibitor. Handles on the 12", 18", and 24" allow for quick repositioning. Each box has three 2" strips of Velcro to enable stacking and prevent the boxes from slipping. Custom logos are available on 24" boxes, contact factory for details.
